INSTALLATION INSTRUCTIONS

MODEL 450446 VERTICAL MAGNETIC SWITCH

Please read these instructions carefully. **Failure** to comply to instructions and **designed** operation of this system, may **void** the warranty.

STEP 1

Fix the switch to the discharge line using the enclosed clamp. The clamp should be mounted approximately 17" above the base of the pump.

STEP 2

The minimum and maximum water level adjustments were done at the factory, for most of the submersible sump pumps. You may change the adjustment by raising or lowering the position of the metal stoppers.

STEP 3

Plug the switch cable in the receptacle, then plug the pump cable in the piggy-back of the switch cable.

43 cm
17"

Electric pump,
check valve and
pipe not included
